7th Edition

# What is the PyConES?

**PyConES is the largest event of the Spanish Python community.**

The conference follows the structure of the worldwide PyCon event and, this year, it will include new features over the previous successful editions organized in Madrid, Zaragoza, Valencia, Almería, Cáceres and Málaga.

**It will be held for the seventh time on 4, 5 and 6 October 2019 in Alicante.**

This new edition will take place in the campus of the University of Alicante and will be co-organized by the community of Python Alicante and the Spanish Python Association.

# The event

**The PyConES is a conference where professionals and enthusiasts of the Python programming language meet to spread their experience in several sessions of talks, posters and workshops.**

Due to its nature, the PyConES audience does not only come from technological sectors (such as Web design, business intelligence and game development) , it also reaches an academic audience, especially since Python is a widely accepted language by many professors and researchers.

Conference attendees will be able to enjoy the latest advances in different areas of knowledge such as: web development, visualization, security, science, data science, education, among others. As well as to know the most recent developments of the Python language. In addition, this year's edition will focus on the internationalization of the conference, so there will be numerous talks in English.

# Some facts

**The last edition of the PyConES held in Malaga (2018) included:**

~600 attendees

100 more than the edition of Cáceres 2017 and 200 more than Almeria in 2016.

+50 speakers

The lectures of all the editions are found available on the YouTube channel of the Spanish Python association, with more than 160.000 visualizations and almost 3,000 subscribers.

+5 workshops

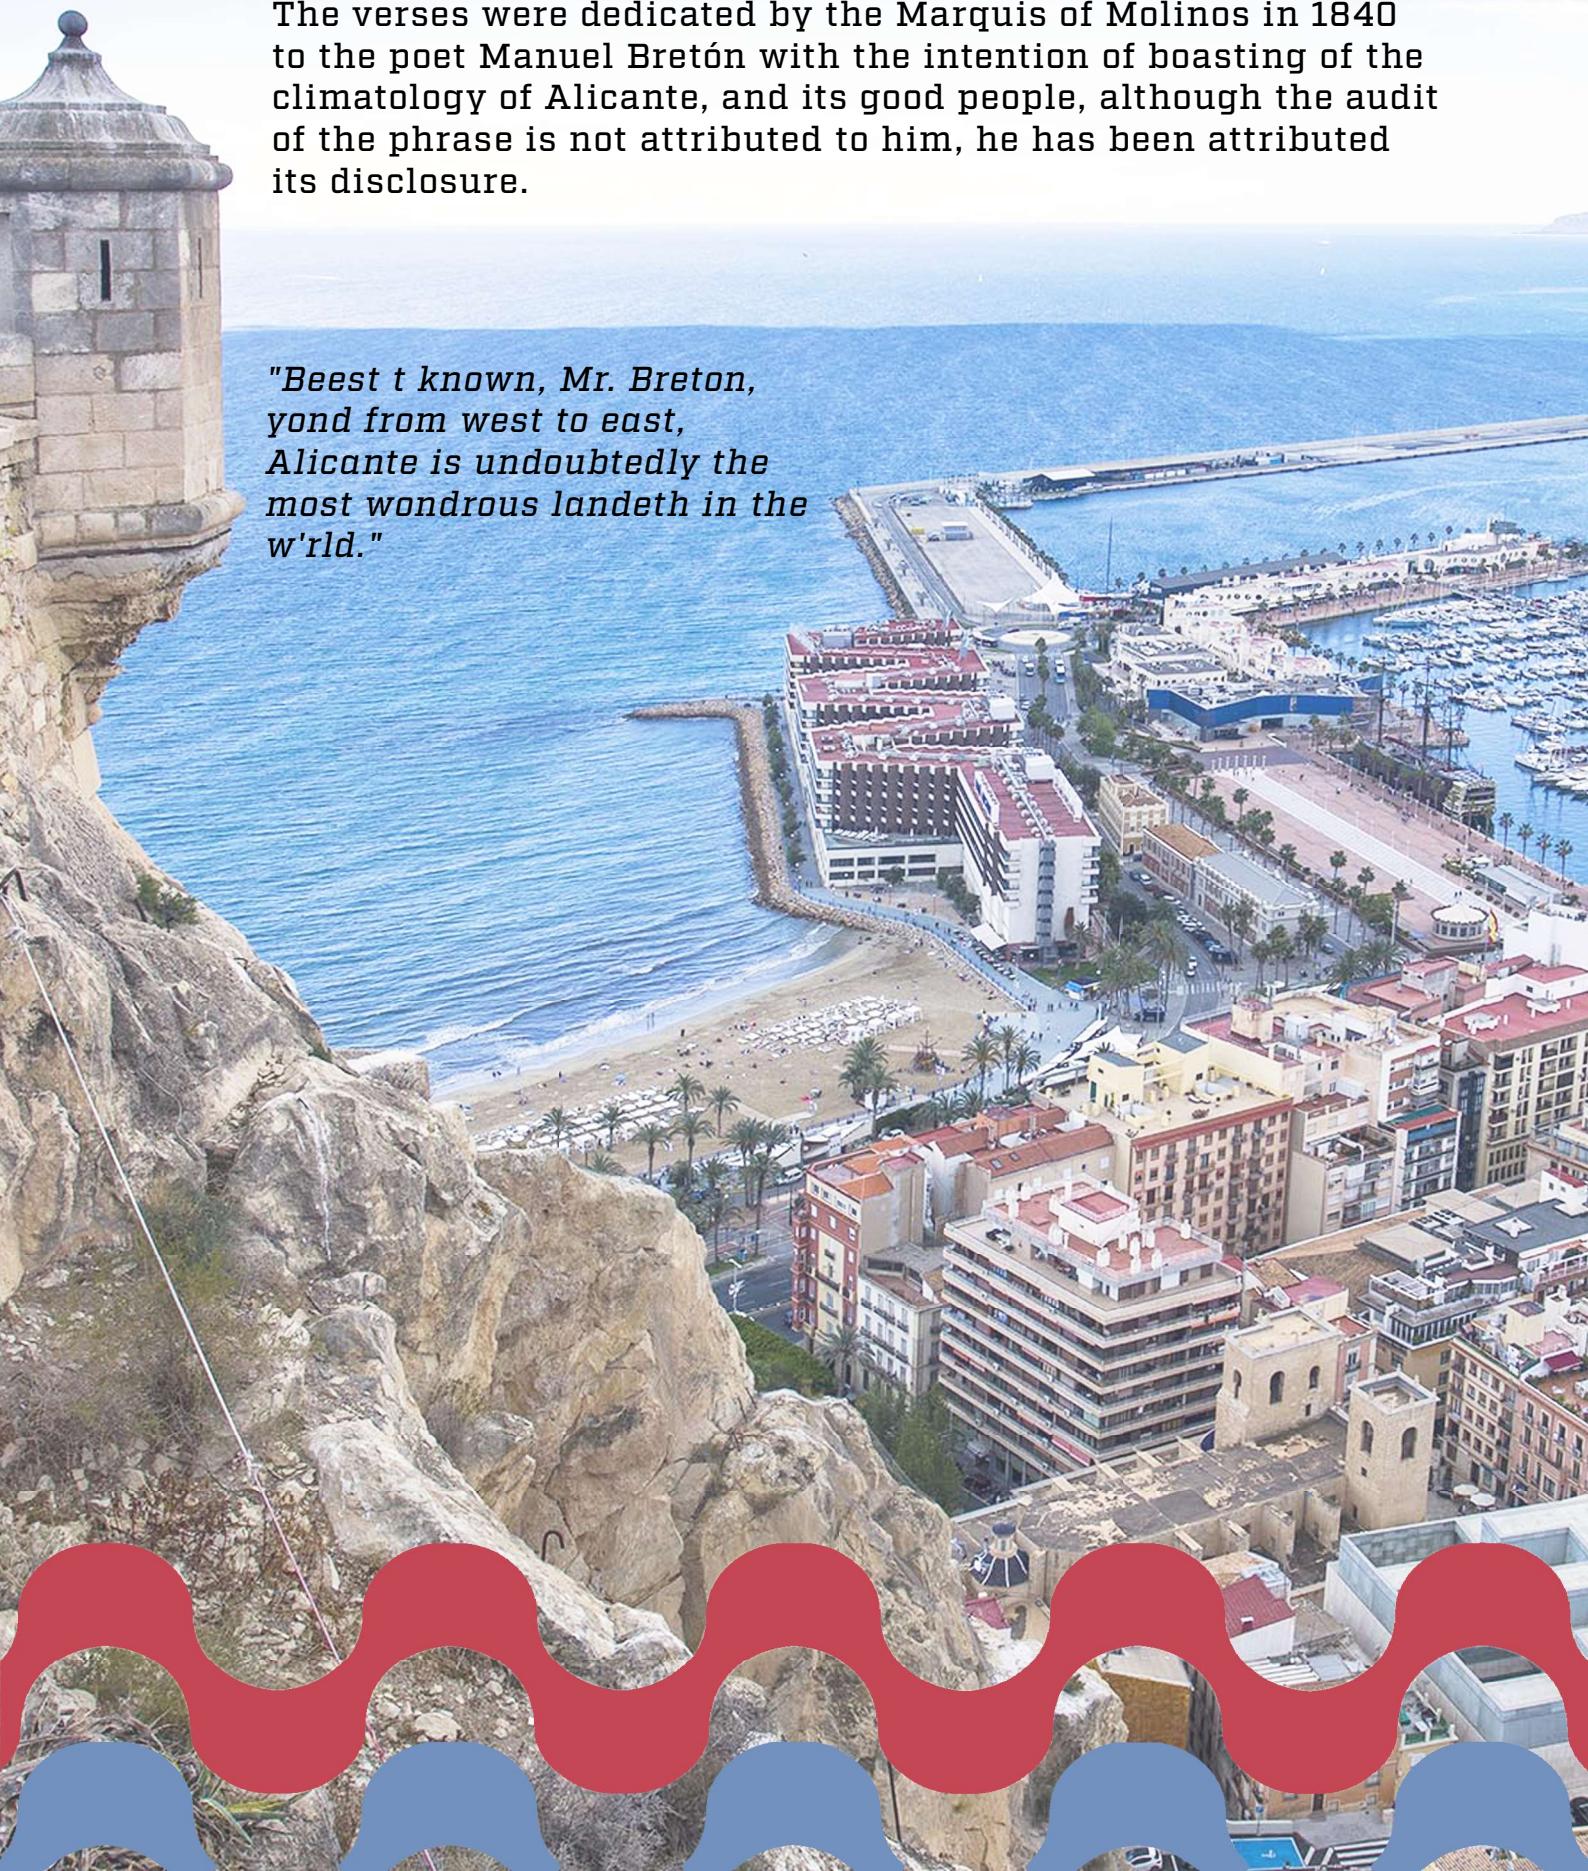

Introduction and Specialization in diverse tools (Pyomo, Pandas, Django,...).

1 hackaton

# The city

The verses were dedicated by the Marquis of Molinos in 1840 to the poet Manuel Bretón with the intention of boasting of the climatology of Alicante, and its good people, although the author of the phrase is not attributed to him, he has been attributed its disclosure.

*"Beest t known, Mr. Breton,  
yond from west to east,  
Alicante is undoubtedly the  
most wondrous landeth in the  
w'rld."*

# The city

**Alicante, also known as *La Terreta*, is a city to be enjoyed with every sense.**

Alicante is a welcoming and dynamic city: its beaches bathed by the warm waters of the Mediterranean Sea, its stunning buildings and its museums are part of the great attraction of a city that invites you to explore it.

**Alicante is committed to become a reference point for technological companies.**

Since 2008, the technology sector in the Valencian Community has achieved an annual turnover of around 21,000 million euros, attracting an enormous number of companies and entrepreneurs from Europe, which consider the capital of the Levante region as an ideal location in southern Europe and as an alternative to the large metropolises. This is due to the enormous support of the authorities, its urban infrastructure and the climate. Alicante and its province have become a strong candidate to be a new kind of "Silicon Valley of Southern Europe".

Note: Each level of sponsorship contributions do not include taxes.

1. For sponsorships over 6.000 euros and their advantages, contact the organization.
  2. This edition will have different length sessions, specifically, short and long.
  3. All companies will be able to publish job offers on the web (according to sponsorship level and availability).
  4. The number of tickets is conditioned by the maximum available capacity, so, in case of requiring more tickets, please contact us until June 2019.
- \* The tickets will be handed over once the total amount of the contribution has been paid.

# Sponsorship levels

One of the biggest requests from previous sponsors has been the number of tickets per sponsorship, so this new edition has taken 2 measures: increase the number of tickets per sponsor, and increase the discount on additional tickets purchased by sponsoring companies.

In addition, as a novelty in this edition, companies may participate, together with the academic committee, in the evaluation of the works submitted to the best talk and best poster award. They will also be able to place a promotional poster of the company in the different sessions dedicated specifically to this purpose (depending on the level of sponsorship).

Contact us for other forms of sponsorship, such as, for example:

- Coffee breaks
- Meals
- Recording and editing of the talks
- Accreditations
- Social events
- Hackathons
- Nursery / Playroom
- Sponsor "Keynoters"
- ...

# About the organization

## PyConES is an initiative of the Spanish Python Association.

This is a non-profit association constituted in 2013 by volunteers from all over the national territory, whose aims are to promote the use of the Python programming language in Spain, serve as a meeting point for those interested in its usage and give them support to their full extent. The 2019 edition is made possible thanks to the local community of Python Alicante, and the collaboration of different collectives and associations, which use a whole year to ensure the success of the conference.

## Acknowledgements

In this brochure we have used pictures from previous editions of the PyConES, so we would like to thank the work done by the photographers. The photographs of the city of Alicante have been extracted from [www.alicanteturismo.com](http://www.alicanteturismo.com), remaining the author's rights assigned to the original property of the same ones. Icons of the table with the levels of sponsorships were designed by Dimitry Miroliubov and obtained from [www.flaticon.com](http://www.flaticon.com). We thank Miguel Torregrosa for the design of the cover logo and Sergiu Oprea for the design of this brochure.
